## Shameless bias by omission

L. Brent Bozell III, 23 May 2012

You'd think the largest legal action in American history in defense of religious liberty would be a major news story. But ABC, CBS, and NBC don't judge news events by their inherent importance as relates to the future of our freedoms. They deliver the news according to a simple formula: Does it, or doesn't it, advance the re-election of Barack Obama?

### ***These Men I Knew***

Who were these men I knew. That I met as strangers and taught what is true.

Laying weeks in a Ranger Grave.

Muddy.

Scared.

Wet.

Lonely.

Huddling for warmth.

Survival doesn't heed the machismo in us.

You could hear the quiet chattering of each other's teeth over the squawk of the field radio. Paralyzed with cramps so painful in the ribs from shaking with chills. I have to sleep and you stay watch. I will tell you when time is up.

Tomorrow we pull out and hump fifty clicks to an attack, Our feet will bleed and our skin will chafe from the dirt on our

bodies. The bugs have taken residence in our skin and it burns and itches. Some of us have dysentery and cut holes in our pants so we can relieve ourselves without missing a beat. Haven't had a warm meal in weeks. We look into each other's gaunt faces and sunken eyes and drive on. Keep that rifle clean because that will save your life.

Where else in my life did I see the best and worst of humanity in the same place? Where else in my life did I have to push the envelope on my body and mind so hard for so many months?

It was when I was a Soldier. And I don't need to look for heroes anymore. I have already met them.

*The lines above were written by a soldier who served in the Rapid Deployment 7th Infantry Division (LIGHT) in Central and South America, 1987-1990.*

France no longer claims center stage in world history, but it remains influential beyond its national borders. Will its recent

presidential election continue that tradition?

## **Global Warming melts away**

by Randall Hoven, 3 May 2012

Wondering where things stand on global warming? Let's go to the science of it. And by "science" I mean physical observations. Nothing complicated. What do thermometers say? What's happening with polar ice caps? And carbon dioxide? In the following analysis I use publicly available data as provided by government scientists at places like NASA, the U.K. Met office, and NOAA. This is the data we're told to use and trust. I'm using it and trusting it...
