## Victory on Okinawa

April 1 to June 21, 1945

*The aircraft carrier USS Bunker Hill, after being hit by two kamikaze planes within 30 seconds on May 11. Very heavily damaged, she was repaired in the U.S. and remained afloat (in various classifications) until 1973.*

The Battle of Okinawa, codenamed Operation Iceberg, was fought on the Ryukyu Islands of Okinawa and was the largest amphibious assault in the Pacific War. The 82-day-long battle lasted from early April until mid-June, 1945. The battle has been referred to as the "Typhoon of Steel"... Perhaps the very best account of the battle is in this wonderful book. Most of our aircraft were inferior to those flown by the Japs. All the U.S. pilots knew the odds were badly against them. Owing to the exigencies of battle, many of those in the worst planes knew that death was certain. They did their duty nonetheless.
